<b>Degree</b>	301 - Degree in Nursery School Education 302 - Degree in Nursery School Education 303 - Degree in Nursery School Education
<b>ECTS</b>	6.0
<b>Year</b>	3
<b>Semester</b>	Half-yearly
<b>Subject Type</b>	Compulsory
<b>Module</b>	---

**1.General information****1.1.Introduction**

Psychology and child health is taught in the second term of the third year, being one of the subjects that shape the obligatory course entitled "Childhood, health and feeding", that has introduced students to the knowledge of their own body. It would be a question of extending this knowledge to psychological aspects (emotional, behavioral and social).

In this subject, the elements that facilitate the good physical, emotional, communicative, cognitive and social development of children are analysed. Similarly, the knowledge and development of resources that allow the detection of deviations when they appear are analysed so that the process could be re-directed.

**1.2.Recommendations to take this course****1.3.Context and importance of this course in the degree****1.4.Activities and key dates****2.Learning goals****2.1.Learning goals**

1. Being conscious of the relevance of the social, family and school context in child development and having resources to work with the family and other health and psycho-social professionals involved in the care of children under seven years of age.
2. Knowing the needs, problems and difficulties related to the acquisition of habits, rules, values, behaviour and autonomy and developing resources to manage them, in the period from 0 to 6 years old.
3. Being capable of detecting and identifying needs and valuing their importance and preventing difficulties, deficits and emotional, affective, relationship or welfare difficulties that disturb the biopsychosocial development of children aged 0-6.

4. Knowing how to manage the resources for education in the Infant School, favouring healthy development, attending to the individual and social needs of children.
5. Handling the basic principles of healthy behavioural development, knowing the most important programmes in the field of socio-health applied to childhood and being able to design and apply actions for health promotion and detection of difficulties and problems in 0-6 year olds.

## **2.2.Importance of learning goals**

### **3.Aims of the course and competences**

#### **3.1.Aims of the course**

#### **3.2.Competences**

### **4.Assessment (1st and 2nd call)**

#### **4.1.Assessment tasks (description of tasks, marking system and assessment criteria)**

### **5.Methodology, learning tasks, syllabus and resources**

#### **5.1.Methodological overview**

The methodology followed in this course is oriented towards achievement of the learning objectives. It is based on active participation, case studies, teamwork etc. that favors the development of communicative skills and critical thinking. A wide range of teaching and learning tasks are implemented, such as lectures, practical activities, practice sessions, autonomous work, tutorials, and academic guidance.

Further information regarding the course will be provided on the first day of class.

### **5.2.Learning tasks**

The course includes 6 ECTS organized according to:

- Lectures (3 ECTS): 30 hours.
- Practice sessions (2 ECTS): 20 hours.
- Autonomous work ( ECTS): 87 hours.
- Tutorials (1 ECTS): 10 hours.
- Assessment (0,3 ECTS): 3 hours.

Lectures: the professor presents theoretical contents.

Practice sessions: they can involve discussion and presentation of case studies, practical work outside the classroom (field work or visits), and seminars.

Autonomous work: students do tasks such as autonomous study, reading of the course book, preparation of practice sessions and seminars, and summative assignments.

Tutorials: professors' office hours can be used to solved doubts and to follow-up students' work.

Assessment: final examination

### **5.3.Syllabus**

The course will address the following topics:

1. Conceptual introduction to the concepts of health and biopsychosocial welfare.
2. The needs of children.
3. Acquisition of healthy habits.
4. Development of personal skills, autonomy and self-control.
5. Development of interpersonal relationships and sociable behaviour.
6. Healthy relationships with families.
7. Relationships with the educational community (school, socio-health).

#### **5.4.Course planning and calendar**
