#### **5.1.Methodological overview**

The learning process designed for this course is planned as follows:

The learning process designed for the course Financial Statements comprises 6 ECTS credits and distributes 150 student working hours in 60 class hours (theoretical and practical) and 90 distance learning hours.

## 27617 - Financial Statements

The 60 class hours of theoretical and practical sessions consist of 30 participative lectures and 30 practical hours solving problems and practical cases.

### 5.2.Learning tasks

- Participatory lectures : These will involve the description and explanation of basic concepts referring to the disclosure of accounting reporting by companies, in particular, dealing with the content of the annual accounts. In these lectures, the participation of students will be essential to discuss the main concepts analysed in each session.

Participatory lectures will last 2 hours and will include a revision of the most relevant concepts and the explanation of new concepts, finishing with a summary of the most relevant points of the lecture.

Students will have at their disposal the recommended bibliography for each lesson and they are expected to review it in detail before attending the corresponding lecture.

- Practical classes . Every week, besides the theoretical participatory lecture, students will attend a practical class to solve cases. There will be two types of problems and cases. Some of them will be designed to consolidate and to help to understand the most relevant issues explained in the participatory classes. Others will deal with real business information, working with annual reports of companies that are publicly traded for easy access to the information.

Some problems and cases will be done individually but there will be other cases that will be solved by groups of 2-3 people using the methodology of the cooperative learning. Some of these cases solved in groups will have to be presented to the other class members during classes.

Finally, the 90 hours of the student's distance learning will consist of 30 reading hours and personal reflection about the programme of the course or the bibliography, 30 hours to complete the group task and 30 hours to do individual exercises, participating in learning platforms and tutorials.
