

28331 - Land Management: Factors and Scales (II)

Información del Plan Docente

Academic Year	2017/18
Faculty / School	103 - Facultad de Filosofía y Letras
Degree	419 - Degree in Geography and Land Management
ECTS	4.0
Year	4
Semester	Second semester
Subject Type	Compulsory
Module	---

1.General information

1.1.Introduction

1.2.Recommendations to take this course

1.3.Context and importance of this course in the degree

1.4.Activities and key dates

2.Learning goals

2.1.Learning goals

2.2.Importance of learning goals

3.Aims of the course and competences

3.1.Aims of the course

3.2.Competences

4.Assessment (1st and 2nd call)

4.1.Assessment tasks (description of tasks, marking system and assessment criteria)

5.Methodology, learning tasks, syllabus and resources

5.1.Methodological overview

The learning process designed for this subject is based on the following:

Sessions on the theoretical contents of the subject. The teacher present and discuss in the classroom general and methodological aspects of the detailed contents on the agenda. These sessions take the form of interactive exhibits, with student participation.

Practice sessions, supervised by the teacher. Its aim is that students are able to take decisions that will allow solving problems related to land use. It is intended them to familiarize with key information sources

28331 - Land Management: Factors and Scales (II)

and the proper treatment of obtained information by applying the most common methods and techniques.

Seminars aim to promote, through discussion, reasoning ability and communication. The seminars will guide the exchange of ideas about issues that are on agendas.

Field work. It will allow students to observe "in situ" some cases of territorial disorders and of ordered spaces. Fieldwork will help the student in the interpretation of the territory.

Tutorial. Facilitates the monitoring of the teaching-learning process and the group or individualized counseling on development of practical work and seminars.

5.2.Learning tasks

The program offered to students will help them to achieve the expected results. It includes the following activities ...

1. Theoretical sessions: 15 hours

2. Practical sessions: 10 hours

In them the methods and techniques commonly used in regional planning will be developed

3. Seminars: 6 hours

4. Fieldwork: 9 hours

5.3.Syllabus

1. Economic activities in regional planning.

2. Natural Protected Areas in regional planning .

3. Natural resources in regional planning

5.4.Course planning and calendar

Theoretical and practical sessions will be held in large group and in the place and time stipulated by the Dean.

Direction of work practices, preparation of seminars and personal student guidance will be held in the teacher's office.

Field work will be determined in accordance with the degree coordination

Seminars, in small group, will take place in the last days of the semester.
