

29718 - Materials: Technology

Información del Plan Docente

Academic Year	2017/18
Faculty / School	110 - Escuela de Ingeniería y Arquitectura
Degree	330 - Complementos de formación Máster/Doctorado 434 - Bachelor's Degree in Mechanical Engineering
ECTS	6.0
Year	---
Semester	Indeterminate
Subject Type	Compulsory, ENG/Complementos de Formación
Module	---

1.General information

1.1.Introduction

1.2.Recommendations to take this course

1.3.Context and importance of this course in the degree

1.4.Activities and key dates

2.Learning goals

2.1.Learning goals

2.2.Importance of learning goals

3.Aims of the course and competences

3.1.Aims of the course

3.2.Competences

4.Assessment (1st and 2nd call)

4.1.Assessment tasks (description of tasks, marking system and assessment criteria)

5.Methodology, learning tasks, syllabus and resources

5.1.Methodological overview

The methodology followed in this course is oriented towards achievement of the learning objectives. It is based on participation and the active role of the student favors the development of communication and decision-making skills. A wide range of teaching and learning tasks are implemented, such as lectures, guided assignments, laboratory sessions, autonomous work, and tutorials.

29718 - Materials: Technology

Students are expected to participate actively in the class throughout the semester.

Further information regarding the course will be provided on the first day of class.

5.2.Learning tasks

- Lectures (1,52 ECTS): 38 hours.
- Laboratory sessions (0,48 ECTS): 12 hours.
- Guided assignments (0,40 ECTS): 10 hours.
- Autonomous work (2 ECTS): 50 hours.
- Tutorials (1,6 ECTS): 40 hours.

Lectures: the professor will explain the theoretical contents of the course and solve illustrative applied problems. These problems and exercises can be found in the problem set provided at the beginning of the semester. Lectures run for 3 weekly hours. Although it is not a mandatory activity, regular attendance is highly recommended.

Laboratory sessions: sessions will take place every 2 weeks (4 sessions in total) and last 3 hours each. Students will work together in groups actively doing tasks such as practical demonstrations, measurements, calculations, and the use of graphical and analytical methods.

Guided assignments: students will complete assignments, problems and exercises related to concepts seen in laboratory sessions and lectures. They will be submitted at the beginning of every laboratory sessions to be discussed and analyzed. If assignments are submitted later, students will not be able to take the assessment test.

Autonomous work: students are expected to spend about 90 hours to study theory, solve problems, prepare lab sessions, and take exams.

5.3.Syllabus

1. Forming of metals. Solidification and casting. Metal forming. Powder metallurgy.
2. Forming of polymers. Thermosets, thermoplastics, rubbers.
3. Forming of composite materials.
4. Forming of ceramics and glasses. Traditional ceramics. Advanced ceramics. Glass.
5. Joining technologies. The metallurgy of welding.
6. Oxidation and corrosion of metals. Degradation of polymers.
7. Brittle fracture of ceramics. Creep. Creep-fatigue interaction.
8. Failure analysis. Non destructive testing. Methodology.
9. Materials selection for mechanical design.

5.4.Course planning and calendar

For further details concerning the timetable, classroom and further information regarding this course please refer to the "Escuela de Ingeniería y Arquitectura " website (<https://eina.unizar.es/>)

5.5. Bibliography and recommended resources

[BB: Basic Bibliography / BC: Additional Bibliography]

- [BB] 1. Tecnología de materiales / José Antonio Puértolas Rrafales , Ricardo Ríos Jordana, Miguel Castro Corella, José Manuel Casals Bustos (eds.) ; [Luis Alberto Angurel Lambán, Miguel Artigas Álava, Javier Castany Valeri, Isabel Clavería, Jesús Cuartero Salafranca, Juan Carlos Díez Moñux, Jesús Fuentelsanz Gallego, Luis Gracia Villa, Antonio Miravete de Marco, José Ignacio Peña Torre, Javier Rubín Llera, Anselmo Villellas Malo ... (et al.)] Madrid : Síntesis, D.L. 2009
