

62955 - Design for sustainability

Información del Plan Docente

Academic Year	2017/18
Faculty / School	110 - Escuela de Ingeniería y Arquitectura
Degree	562 - Master's in Product Development Engineering
ECTS	4.5
Year	1
Semester	Second semester
Subject Type	Optional
Module	---

1.General information

1.1.Introduction

1.2.Recommendations to take this course

1.3.Context and importance of this course in the degree

1.4.Activities and key dates

2.Learning goals

2.1.Learning goals

2.2.Importance of learning goals

3.Aims of the course and competences

3.1.Aims of the course

3.2.Competences

4.Assessment (1st and 2nd call)

4.1.Assessment tasks (description of tasks, marking system and assessment criteria)

5.Methodology, learning tasks, syllabus and resources

5.1.Methodological overview

The methodology followed in this course is oriented towards achievement of the learning objectives. In lectures, the whole student group is present, and the teacher explains the most theoretical aspects of the course contents and some illustrative case studies are solved. Practice sessions are conducted in smaller groups to work with specialized computer applications. They are intended to promote practical learning, so it is recommended to attend practice sessions, where students can experience directly with real means of design and analysis.

62955 - Design for sustainability

5.2.Learning tasks

The course includes the following learning tasks:

- Lectures (30 hours).
- Practice sessions (15 hours).

5.3.Syllabus

The course will address the following topics:

Lectures

1. Methodology to identify and assess sustainability factor in design processes
2. Life Cycle Assessment methods
3. Environmental impact categories
4. Life Cycle Assessment Tools (SIMAPRO, ECOINVENT, ECOCAD, ECOTOOL)
5. Design for sustainability
6. Design criteria to reduce critical raw material consumption
7. Design for reuse and recyclability
8. Design for use and repairability
9. Regional factor

Practice sessions

1. Ecocad
2. Ecotool
3. Simapro
4. Sustainable electronics
5. Repairability and Recyclability

5.4.Course planning and calendar

Further information concerning the timetable, classroom, office hours, assessment dates and other details regarding this course, will be provided on the first day of class.

5.5.Bibliography and recommended resources
