<b>Module:</b>	---

### **General information**

#### **Aims of the course**

#### **Context and importance of this course in the degree**

#### **Recommendations to take this course**

#### **Learning goals**

#### **Competences**

#### **Learning goals**

#### **Importance of learning goals**

#### **Assessment (1st and 2nd call)**

#### **Assessment tasks (description of tasks, marking system and assessment criteria)**

#### **Methodology, learning tasks, syllabus and resources**

#### **Methodological overview**

The learning process that has been designed for this subject is based on the following:

- Theoretical-practical exposition in the classroom of the contents of the program

- Support of audiovisual methodology in the development of content

- Active participation of the students, both in group and individually, to promote meaningful and collaborative learning by exposing cases or examples of their interest, reflection and critical thinking through debate, etc.

- Development of assumptions and case studies, role-playing and any other methodology that develops the practical sense of the subject and the abilities of the students

## **Learning tasks**

1. Theoretical sessions in which work will be carried out stimulating participation and active learning by students

2. Practical sessions in which practical cases will be examined, from which teamwork and cooperative/collaborative learning will also be encouraged

3. Individual and collective tutorials
