

26600 - Psychology of Education

Información del Plan Docente

Academic Year	2018/19
Subject	26600 - Psychology of Education
Faculty / School	107 - Facultad de Educación 202 - Facultad de Ciencias Humanas y de la Educación 301 - Facultad de Ciencias Sociales y Humanas
Degree	300 - Degree in Primary School Education 298 - Degree in Primary School Education 299 - Degree in Primary School Education
ECTS	6.0
Year	1
Semester	First semester
Subject Type	Basic Education

Module

1.General information

1.1.Aims of the course

1.2.Context and importance of this course in the degree

1.3.Recommendations to take this course

2.Learning goals

2.1.Competences

2.2.Learning goals

The student, to be able to pass the subject, will have to demonstrate the following results:

1. Describing the different explanatory models of human behavior according to the principal paradigms of scientific Psychology.
2. Identifying the principal epistemological, methodological and disciplinary problems in Psychology of Education.
3. Analyzing the personal and interpersonal dimensions involved in the teaching/learning process.
4. Defining and explaining the principal models of learning and their applications in the classroom.
5. Understanding and relating the role that the different systems that take part in the educational process play: microsystem (school, family and peers), mesosystem, endosystem, macrosystem, chronosystem and globosystem.
6. Identifying the principal topics of educational orientation in Primary Education.

2.3.Importance of learning goals

This subject offers the students a first contact with the psychology-related contents that they will have to deal with during their studies. The aim with this subject is for the students to internalise the semantic academic structure reflected in the previous point (point 2.1.), combining it with the semantic experiential structure, that is, with their personal experience.

26600 - Psychology of Education

3. Assessment (1st and 2nd call)

3.1. Assessment tasks (description of tasks, marking system and assessment criteria)

4. Methodology, learning tasks, syllabus and resources

4.1. Methodological overview

The methodology followed in this course is oriented towards achievement of the learning objectives. It is based on active participation, case studies, teamwork etc. that favors the development of communicative skills and critical thinking. A wide range of teaching and learning tasks are implemented, such as lectures, practical activities, practice sessions, autonomous work, tutorials, and academic guidance.

Further information regarding the course will be provided on the first day of class.

4.2. Learning tasks

The course includes 6 ECTS organized according to:

- Lectures (3 ECTS): 30 hours.
- Practice sessions (2 ECTS): 20 hours.
- Autonomous work (ECTS): 87 hours.
- Tutorials (1 ECTS): 10 hours.
- Assessment (0,3 ECTS): 3 hours.

Lectures: the professor presents theoretical contents.

Practice sessions: they can involve discussion and presentation of case studies, practical work outside the classroom (field work or visits), and seminars.

Autonomous work: students do tasks such as autonomous study, reading of the course book, preparation of practice sessions and seminars, and summative assignments.

Tutorials: professors' office hours can be used to solve doubts and to follow-up students' work.

Assessment: final examination

4.3. Syllabus

Contents
