

27041 - Differentiable Manifolds

Información del Plan Docente

Academic Year	2018/19
Subject	27041 - Differentiable Manifolds
Faculty / School	100 - Facultad de Ciencias
Degree	453 - Degree in Mathematics
ECTS	6.0
Year	4
Semester	First semester
Subject Type	Optional
Module	---

1.General information

1.1.Aims of the course

1.2.Context and importance of this course in the degree

1.3.Recommendations to take this course

2.Learning goals

2.1.Competences

2.2.Learning goals

2.3.Importance of learning goals

3.Assessment (1st and 2nd call)

3.1.Assessment tasks (description of tasks, marking system and assessment criteria)

4.Methodology, learning tasks, syllabus and resources

4.1.Methodological overview

Methodology for the course:

- Lectures
- Problem sessions in small groups
- Office hours.
- Students' individual work.

4.2.Learning tasks

At the end of each chapter there will be an exercise to prove the understanding of the contents and guarantee the

27041 - Differentiable Manifolds

learning process.

4.3.Syllabus

Contents

Differentiable manifolds.

The topology of a manifold . Partitions of the unity.

Differentiation on a manifold

Submanifolds

Quotient manifolds

Vector fields

Embedding theorems.

Transversality.

4.4.Course planning and calendar

See the academic calendar of the Universidad de Zaragoza.

Dates for exercises will be announced in class and posted on the online platform Moodle.

The same will be done with the date, place and time of the final exam.

4.5.Bibliography and recommended resources
