

28837 - Computer-Assisted Design for Engineering

Información del Plan Docente

Academic Year	2018/19
Subject	28837 - Computer-Assisted Design for Engineering
Faculty / School	175 - Escuela Universitaria Politécnica de La Almunia
Degree	424 - Bachelor's Degree in Mechatronic Engineering
ECTS	6.0
Year	4
Semester	Second semester
Subject Type	Optional
Module	---

1.General information

1.1.Aims of the course

1.2.Context and importance of this course in the degree

1.3.Recommendations to take this course

2.Learning goals

2.1.Competences

2.2.Learning goals

2.3.Importance of learning goals

3.Assessment (1st and 2nd call)

3.1.Assessment tasks (description of tasks, marking system and assessment criteria)

4.Methodology, learning tasks, syllabus and resources

4.1.Methodological overview

The learning process that is designed for this subject is based on the following:

- Theoretical-Practical classes: Theoretical activities conducted by the teacher, so that the theoretical support of the subject is given, highlighting the major issues, structuring them on chapters and / or sections and connecting them to each other. Theoretical discussion activities or practice work preferably performed in the classroom and requiring high student participation
- Individual and/or group tutorials: These are made on a one-to-one basis, at the department. They aim to help solving problems that are the students might have, particularly those which for several reasons cannot attend group tutorials or need a more personalized attention. These tutorials may be face-to-face or virtual (Moodle or e-mail) in a timetable published on the EUPLA website

4.2.Learning tasks

The program that the students are offered to help them achieve the expected results involves the following activities...

... which involve the active participation of the students, so that, to achieve the learning outcomes, the following activities will be developed

- **Theoretical-Practical classes (30h):** The concepts and procedures of the subject will be developed and practical examples as support will be developed. Also, problems and case studies will be done to complement the theoretical concepts studied
- **Lab practice work (30h):** Students will be divided into several groups being monitored by the teacher and they will develop the concepts and procedures, particularly those of CAD-CAE
- **Tutorials:** Monitored autonomous activities: Although they will rather have a mixed nature between face-to-face and non-class tuition they have been considered separately and will be focused mainly to seminars and tutorials under the supervision of the teacher.

4.3.Syllabus

Essential Contents of the subject for the achievement of learning outcomes

INTRODUCTION

- Program and presentation of the course
- Digital prototypes
- Modeling, assemblies and documentation (reminder)
- Presentations and documentation (reminder)

ELEMENTS AND SETS

- Plastic parts and operations
- Special mechanical elements
- Welded sets
- Metal sheet and metal sheet generator

CABLES AND PIPES

- Cables and harnesses
- Pipes and pipelines

ANALYSIS

- Stress analysis
- Structure Analysis
- Dynamic Simulation
- Simulation-Studio

4.4.Course planning and calendar

The Theory and Problem-Solving Lectures and the practical sessions in the laboratory are given according to the schedule set up by the School and it is published, prior to the start date of the course, on the EUPLA website, as well as the tutorial schedule.

28837 - Computer-Assisted Design for Engineering

The most significant dates -**Planning of the Subject**- (initial test, work proposals, and presentations ...) will be explained in the classroom, at the beginning of the course and in the Moodle Virtual Classroom.

The weekly schedule of the subject will be published at
<http://www.eupla.unizar.es/asuntos-academicos/calendario-y-horarios>

The dates of the global evaluation test (**official calls**) will be published at
<http://www.eupla.unizar.es/asuntos-academicos/examenes>

4.5. Bibliography and recommended resources

RESOURCES:

- Access to the subject documentation using the Moodle platform
