

Year : 2018/19

28960 - Building installations

Syllabus Information

Academic Year:	2018/19
Subject:	28960 - Building installations
Faculty / School:	201 -
Degree:	437 - Degree in Rural and Agri-Food Engineering
ECTS:	5.0
Year:	4
Semester:	Second semester
Subject Type:	Optional
Module:	---

Methodology, learning tasks, syllabus and resources

Methodological overview

The learning process designed for this course is based on the following methodologies: Theoretical sessions, Problem-based learning, Project based learning and Computer lab sessions.

Learning tasks

The program that the student is offered to achieve the expected results includes the following activities:

- Theoretical sessions (2,5 ECTS):
 - o The teacher explains the theoretical content of each session. One of the objectives of this activity will be the promoting of the participation of the students and the cooperative learning.
 - o Problem-solving sessions. The teacher will resolve specific problems.
- Practical sessions (2,5 ECTS):
 - o Problem-based learning. Students, working individually or in groups, gain knowledge and skills by working to respond problems and questions.
 - o Computer lab sessions. Students use technical software.
 - o Project-based learning. Students gain knowledge and skills by working with examples of real projects.

Syllabus

Theory Program

MODULE 1. Cold water supply and distribution

1. Basic regulation.
2. Components of the installation.
3. Calculating the installation.

MODULE 2. Domestic hot water production and distribution

1. Basic regulation.
2. Components of the installation.
3. Calculating the installation.

MODULE 3. Water evacuation

1. Basic regulation.
2. Components of the installation.
3. Calculating the installation.

MODULE 4. Fire protection installation

1. Basic regulation.
2. Components of the installation.
3. Calculating the installation.

MODULE 5. Emergency electrical installations

1. Basic regulation.
2. Components of the installation.
3. Calculating the installation.

Practical program

1. Calculating a water supply installation for a building in the agricultural and/or food processing domain.
2. Calculating a water evacuation installation for a building in the agricultural and/or food processing domain.
3. Calculating the fire protection installations for a building in the agricultural and/or food processing domain.
4. Calculating the emergency lighting installation for a building in the agricultural and/or food processing domain.

Course planning and calendar

Week	Theoretical sessions (h)	Practical sessions (h)	Individual work (h)	Total (h)
1	1	0	1,5	2,5
2	2	2	6	10
3	2	2	6	10
4	2	2	6	10
5	2	2	6	10
