

Year : 2018/19

29921 - Mass Transfer

Syllabus Information

Academic Year:	2018/19
Subject:	29921 - Mass Transfer
Faculty / School:	110 -
Degree:	435 - Bachelor's Degree in Chemical Engineering 330 - Complementos de formación Máster/Doctorado
ECTS:	6.0
Year:	330 - Complementos de formación Máster/Doctorado: XX 435 - Bachelor's Degree in Chemical Engineering: 3
Semester:	Half-yearly
Subject Type:	ENG/Complementos de Formación, Compulsory
Module:	---

General information

Aims of the course

Context and importance of this course in the degree

Recommendations to take this course

Learning goals

Competences

Learning goals

Importance of learning goals

Assessment (1st and 2nd call)

Assessment tasks (description of tasks, marking system and assessment criteria)

Methodology, learning tasks, syllabus and resources

Methodological overview

The process learning is based on:

- Theory Sessions

- Practice Sessions
- Autonomous work and study
- Individual tutorials

Classroom materials will be available via Moodle. These include a repository of the lecture notes used in class, the course syllabus, as well as other learning resources.

Further information regarding the course will be provided on the first day of class.

Learning tasks

The course includes 6 ECTS organized according to:

- **Theory Sessions (40 h)**: Theoretical lectures with the resolution of exercises and questions in classroom.
- **Practice Sessions (20 h)**: Students solve problems by himself in the classroom under the supervision of the teacher.
- **Supervised activities in small groups (12 h)**: Students form groups of two people. Every group solves two problems proposed by the teacher and one problem proposed by the group. The three works are evaluated with feedback for the students.
- **Autonomous study (72 h)**. Continuous study by the student is recommended.

Lecture notes and a series of problems will be available for the students. At the end of each topic, some of the problems will be solved in class by the professor and the rest will be done individually.

Syllabus

The course will address the following topics:

Topic 1: Fundamentals of mass transfer. Diffusion and Convection

Section 1. Diffusion

Topic 2: Stationary State Diffusion

Topic 3: Non-stationary state Diffusion

Topic 4: Diffusion coefficients estimation

Section 2: Diffusion and Convection

Topic 5: Diffusion in concentrated solutions.

Section 3: Mass transfer across interfaces

Topic 6: Mass transfer models. Individual mass transfer coefficients.

Topic 7: Mass transfer across fluid-fluid interface. Global mass transfer coefficients.

Section 4: Heterogeneous Chemical Reactions

Topic 8: Fluid-Fluid reactions

Topic 9: Non-catalytic Solid-Fluid reactions

Course planning and calendar

Theoretical and problems lectures are given following the schedule established by EINA before the beginning of the current academy course. Every teacher will inform the students about individual tutorial schedule.

	Theoretical + Problems Lectures	Deliverables	Individual Study
Topic 1. Fundamentals	4 h + 1 h		2 h
Topic 2. Stationary state diffusion	8 h + 3 h	Delivarable 1 (4 h)	15 h
Topic 3. Non-stationary state diffusion	6 h + 2 h		10 h
Topic 4. Diffusion Coefficients Estimation	1 h + 1 h		2 h
Topic 5. Diffusion in concentrated solutions	4 h + 3 h	Deliverable 2 (4 h)	8 h
Topic 6. Mass transfer models. Individual mass transfer coefficients	2 h + 2 h		5 h
Topic 7. Mass Transfer across fluid-fluid interface.	5 h + 4 h		10 h

Global mass transfer coefficients			
Topic 8. Fluid-Fluid Reactions	5 h + 2 h	Deliverable 3 (4 h)	10 h
Topic 9. Non-catalytic Solid-Fluid Reactions	5 h + 2 h		10 h
Total hours	40 h + 20 h	12 h	72 h

Duration of lessons are estimation
