Información del Plan Docente

Academic Year 2018/19

Subject 30107 - Physics II

Faculty / School 175 - Escuela Universitaria Politécnica de La Almunia
               179 - Centro Universitario de la Defensa - Zaragoza

Degree 425 - Bachelor's Degree in Industrial Organisational Engineering
        457 - Bachelor's Degree in Industrial Organisational Engineering
        563 - Bachelor's Degree in Industrial Organisational Engineering

ECTS 6.0

Year 1

Semester Second semester

Subject Type Basic Education

Module

1. General information

1.1. Aims of the course

1.2. Context and importance of this course in the degree

1.3. Recommendations to take this course

2. Learning goals

2.1. Competences

2.2. Learning goals

2.3. Importance of learning goals

3. Assessment (1st and 2nd call)

3.1. Assessment tasks (description of tasks, marking system and assessment criteria)

4. Methodology, learning tasks, syllabus and resources

4.1. Methodological overview

SPECIALIZATION IN BUSINESS
teaching weeks. To make the timing is used to measure the school week, in which the student must devote to the study of the subject 10 hours.

DEFENSE

This is a general physics course on electromagnetism and optics. It provides students with background knowledge about the physical laws relevant for solving problems in engineering, in particular those related to wave motion, electrostatic, magnetism or optics. Previous knowledge on vector field analysis and calculus is a fundamental prerequisite. Overall, Physics II helps to develop technical skills necessary to overcome some of the subjects in higher courses like Fundamentals of Electrical Engineering and Fundamentals of Electronics.

This course provides the basis of scientific and technological knowledge and application of scientific method. Therefore, the activities and methodology are oriented to the development of critical thinking, analysis and synthesis. A wide range of teaching and learning tasks are implemented, such as theory sessions, laboratory sessions and assignments.

Classroom materials will be available via Moodle. These include a repository of the lecture notes used in class, the course syllabus, as well as other course-specific learning materials.

Further information regarding the course will be provided on the first day of class.

4.2. Learning tasks

SPECIALIZATION IN BUSINESS

The program includes the following activities:

- Theoretical classes: theoretical activities so fundamentally expository given by the teacher.
- Practical classes: practical discussion activities and conducting exercises conducted in the classroom and requiring high student participation.
- Laboratory Practice: Practical activities in laboratories.
- Group tutorials.
- individual tutoring.

DEFENSE

This is a 6 ECTS course organized as follows:

- Lectures. Lecture notes and a set of problems (and their corresponding solutions) will be available for the students. At the end of each topic, some of the problems will be solved in class by the teacher and the rest will be done individually.
- Laboratory sessions. Two-hour sessions that take place in the Physics Lab. Students are provided in advance with task guidelines for each session.
- Autonomous work: involves activities such as homework provided by the teacher, lab reports...
- Office hours for assistance: either individually or in small groups of students.

4.3. Syllabus
SPECIALIZATION IN BUSINESS

The program of the subject includes six topics:
I. Electrostics field
II. Capacity, dielectrics and electric current
III. Magnetic field
IV. Electromagnetic field: Maxwell's equations
V. Wave motion
VI. Optics

DEFENSE

The course will address the following topics:

1 Mechanical waves.

1.1 Wave equation.

1.2 Speed of elastic waves.

1.3 Properties of acoustic waves.

1.4 Superposition, interference and beating.

1.5 Doppler's effect.

2 Electrostatics.

2.1 Charge and electric field (Coulomb's law).

2.2 Gauss's law.

2.3 Electric potential.

2.4 Electrostatics with conductors.
2.5 Capacitance.

2.6 Dielectrics.

3 Electric circuits.

3.1 Ohm's law.

3.2 Resistance and resistivity.

3.3 Steady-state direct current circuits with batteries and resistors only.

3.4 Electromotive force.

4 Magnetic fields.

4.1 Lorentz's force.

4.2 Biot-Savart's law.

4.3 Forces on current-carrying wires in magnetic fields.

4.4 Ampère's law.

5 Electromagnetic induction.

5.1 Faraday's law and Lenz's law.

5.2 Ampère-Maxwell's law.

5.3 Maxwell's equations of electromagnetism.

6 Electromagnetic waves.

6.1 Wave equation and properties of electromagnetic waves.
6.2 Poynting’s vector and energy density.

7 Optics.

7.1 Reflection, refraction. Snell's law.

7.2 Optical elements.

4.4. Course planning and calendar

SPECIALIZATION IN BUSINESS

Planning for weeks about the subject is as follows:

<table>
<thead>
<tr>
<th>Week</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
<th>7</th>
<th>8</th>
<th>9</th>
<th>10</th>
<th>11</th>
<th>12</th>
<th>13</th>
<th>14</th>
<th>15</th>
</tr>
</thead>
<tbody>
<tr>
<td>Topic</td>
<td>I</td>
<td>I</td>

Further information concerning the timetable, classroom, office hours, assessment dates and other details regarding this course will be provided on the first day of class or please refer to the Moodle platform http://moodle.unizar.es

To check the school calendar and timetable visit http://cud.unizar.es/calendarios

4.5. Bibliography and recommended resources
30107 - Physics II

SPECIALIZATION IN BUSINESS

Resources:

Students will have the Moodle virtual platform where you will find notes, powerpoint slides, corollary of exercise, laboratory practices manuals and any other material.

DEFENSE

Resources:

Class materials will be available on Moodle platform at the beginning of term at http://moodle.unizar.es
