ECTS	3.0
Year	1
Semester	Second semester
Subject Type	Optional
Module	---

1.General information

1.1.Aims of the course

1.2.Context and importance of this course in the degree

1.3.Recommendations to take this course

2.Learning goals

2.1.Competences

2.2.Learning goals

2.3.Importance of learning goals

3.Assessment (1st and 2nd call)

3.1.Assessment tasks (description of tasks, marking system and assessment criteria)

4.Methodology, learning tasks, syllabus and resources

4.1.Methodological overview

The teaching methodology will combine lectures with the study, reflection and sharing of some of the proposed texts. In lectures, the theoretical concepts will be explained with the help of research papers, which allow a better understanding of the contents and student participation.

The practice sessions are fundamentally participatory, so that the student takes the leading role in the process of teaching and learning. Thus, from the materials proposed by the teacher, the student must reflect and discuss them using the previously developed theoretical concepts.

The autonomous work of the student will determine the achievement of the learning objectives. This focuses on the reading and understanding of the proposed materials.

4.2. Learning tasks

The course includes the following learning tasks:

- Lectures and seminars: it will be up approximately 50% of the teaching load of the course. In them, the fundamental concepts of the course will be presented. The teacher will make a formal presentation of the relevant contents, the students must assimilate and expand the knowledge through the recommended resources. Additional learning materials will be available to the students.
- Theory and practice sessions: In these various resources related to the contents of the course will be available via the virtual platform Moodle. These resources will be research papers on the topics covered in the lectures. In addition, students can provide resources they consider interesting and related to the course. During these classes, students will reflect and discuss the proposed articles and presentations.
