

Year : 2018/19

## **66712 - Inter and intraurban systems in land planning**

### **Syllabus Information**

<b>Academic Year:</b>	2018/19
<b>Subject:</b>	66712 - Inter and intraurban systems in land planning
<b>Faculty / School:</b>	103 -
<b>Degree:</b>	328 - Master's in Land and Environmental Planning
<b>ECTS:</b>	6.0
<b>Year:</b>	1
<b>Semester:</b>	Annual
<b>Subject Type:</b>	Optional
<b>Module:</b>	---

### **General information**

#### **Aims of the course**

#### **Context and importance of this course in the degree**

#### **Recommendations to take this course**

#### **Learning goals**

#### **Competences**

#### **Learning goals**

#### **Importance of learning goals**

#### **Assessment (1st and 2nd call)**

#### **Assessment tasks (description of tasks, marking system and assessment criteria)**

#### **Methodology, learning tasks, syllabus and resources**

#### **Methodological overview**

The learning process that is designed for this course is based on the following: The cities and the territory stretching around them are complex systems. The systemic perspective is therefore present in the approach to this course, including the study of each of the different elements of the system and their interrelations. Only from that systemic vision can be raised either the analysis of the urbanized territory as its management, which includes not only the planning of urban land but also the management of urbanized and metropolitan areas.

## Learning tasks

The course includes the following learning tasks:

- Lectures on the theoretical aspects of the course.
- Seminars: in several sessions, different analysis techniques on urbanization, and urban and metropolitan areas management will be presented. Students, individually or in groups, will apply the techniques learnt in class.
- Cases study: examples of urban land use planning and management of urbanized and metropolitan areas will be presented.
- Field work: visits to appreciate in situ urbanization processes, or examples of urbanization under management compared to others emerging without such measures.

## Syllabus

The course will address the following topics:

Topic 1. Urban system in regional planning.

Topic 2. Urban space: analysis and management.

Topic 3. Urban and metropolitan areas management.

Topic 4. Urban land use planning.

## Course planning and calendar
