

25637 - Clinical Physiology of Exercise for Health Professionals

Syllabus Information

Academic Year: 2019/20

Subject: 25637 - Clinical Physiology of Exercise for Health Professionals

Faculty / School: 127 - Facultad de Ciencias de la Salud

Degree: 275 - Degree in Physiotherapy

ECTS: 6.0

Year: 3

Semester: Second Four-month period

Subject Type: Optional

Module: ---

1.General information

1.1.Aims of the course

1.2.Context and importance of this course in the degree

1.3.Recommendations to take this course

2.Learning goals

2.1.Competences

2.2.Learning goals

2.3.Importance of learning goals

3.Assessment (1st and 2nd call)

3.1.Assessment tasks (description of tasks, marking system and assessment criteria)

4.Methodology, learning tasks, syllabus and resources

4.1.Methodological overview

The methodology followed in this course is oriented towards the achievement of the learning objectives. A wide range of teaching and learning tasks are implemented, such as lectures, laboratory sessions, autonomous work, study and assessment tasks. To achieve this, the lectures and practicals are interleaved to optimize the learning process, reducing the time from students acquiring theoretical knowledge until the application of this. This strategy is gradually adapted to solve practical problems and cases involving ultimately the more applied part of the module, and a way of bringing students to situations that would confront in a job in the field of physical activity and health in specific populations.

Students are expected to participate actively in class throughout the semester.

Further information regarding the course will be provided on the first day of class.

4.2.Learning tasks

The course includes the following learning tasks:

- a. Lectures. Face to face. 10 hours. Theoretical knowledge is presented to the student. Basics of the course will focus on the topics covered in the program that will be accessible on the ADD of the subject. Students can download in PDF each of the theoretical topics exhibited at each lecture.
- b. Laboratory practical classes and/or seminars. Face to face. 10 hours. Will take place in different premises of the Faculty, biomedical laboratory, weight room, pavilion, outdoor in a small group of 4 to 6 Maximum students. They are interspersed with the lectures. In these practices students will perform the following activities: evaluation of the

components of physical fitness related to health, exercise design and specific training plans derived from the prescription of physical exercise for improvement and/or maintenance of the state with health.

- c. Support for face-to-face tutorials, evaluation. Face to face. 5 hours
- d. Autonomous work for 35 hours. No face to face.

4.3.Syllabus

4.4.Course planning and calendar

4.5.Bibliography and recommended resources
