

26501 - Psychology of Development I

Syllabus Information

Academic Year: 2019/20

Subject: 26501 - Psychology of Development I

Faculty / School: 107 - Facultad de Educación

202 - Facultad de Ciencias Humanas y de la Educación

301 - Facultad de Ciencias Sociales y Humanas

Degree: 301 - Degree in Nursery School Education

302 - Degree in Nursery School Education

303 - Degree in Nursery School Education

ECTS: 6.0

Year: 1

Semester: First semester

Subject Type: Basic Education

Module: ---

1.General information

1.1.Aims of the course

1.2.Context and importance of this course in the degree

1.3.Recommendations to take this course

2.Learning goals

2.1.Competences

2.2.Learning goals

The student, to overcome this subject, must demonstrate the following results...

- 1: Describes children's behavior from 0 to 6 years old in the following areas: physical, sensory-motor, cognitive and linguistic.
- 2: Explains how psychological development occurs in these areas from psychological theories of the evolutionary field, paying special attention to individual differences in how this can occur without implying a problematic deviation.
- 3: Identifies different rhythms of development in specific areas: sensory, motor, cognitive and linguistic.
- 4: Predicts how the psychological development will be for a particular case (with a conventional or unconventional rhythm) from the general theories and the information provided.
- 5: Relates the performance of different agents, family, school, peers, with the process of development optimization.

2.3.Importance of learning goals

3.Assessment (1st and 2nd call)

3.1.Assessment tasks (description of tasks, marking system and assessment criteria)

4.Methodology, learning tasks, syllabus and resources

4.1.Methodological overview

The methodology followed in this course is oriented towards achievement of the learning objectives. It is based on active participation, case studies, teamwork etc. that favors the development of communicative skills and critical thinking. A wide range of teaching and learning tasks are implemented, such as lectures, practical activities, practice sessions, autonomous work, tutorials, and academic guidance.

Further information regarding the course will be provided on the first day of class.

4.2.Learning tasks

The course includes 6 ECTS organized according to:

- Lectures (3 ECTS): 30 hours.
- Practice sessions (2 ECTS): 20 hours.
- Tutorials (1 ECTS): 10 hours.
- Assessment: 8 hours.
- Autonomous work: 82 hours.

Lectures: the professor presents theoretical contents.

Practice sessions: they can involve discussion and presentation of case studies, practical work outside the classroom (field work or visits), and seminars.

Autonomous work: students do tasks such as autonomous study, reading of the course book, preparation of practice sessions and seminars, and summative assignments.

Tutorials: professors' office hours can be used to solve doubts and to follow-up students' work.

Assessment: final examination

4.3.Syllabus

Introduction to Psychology. Psychology of child development. Development of the child in the context of the life cycle in its main areas (physical, sensory, motor, cognitive and linguistic), based on his/her maturation, adaptation and learning periods. Biological and environmental aspects that influence the development of the individual.

4.4.Course planning and calendar
