Module: ---

1.General information

1.1.Aims of the course

1.2.Context and importance of this course in the degree

1.3.Recommendations to take this course

2.Learning goals

2.1.Competences

2.2.Learning goals

2.3.Importance of learning goals

3.Assessment (1st and 2nd call)

3.1.Assessment tasks (description of tasks, marking system and assessment criteria)

4.Methodology, learning tasks, syllabus and resources

4.1.Methodological overview

The methodology followed in this course is oriented towards the achievement of the learning objectives. A wide range of teaching and learning tasks are implemented, such as lectures, workshops, autonomous work and study, and assessment tasks.

This course is developed within the context of the study of human activity, deepening the effect of those activities in the independent operation and health of the people.

The course will lead the student towards the knowledge and the application of tools, techniques and professional skills of intervention and evaluation, which are used in the process of occupational therapy, in the area of occupational performance of work.

4.2.Learning tasks

This course is organized as follows:

- **Lectures** (50 hours). 3 hours a week. Explanation of the different contents of the course, directing the group towards the acquisition of competences and learning results. The materials of the course will be available in Moodle.
- **Workshops** (12.5 hours). Analysis and solution of different practical assumptions, putting into practice the theoretical basis of the course. Work in groups and individually.

- **Autonomous work and study** (87.5 hours).
- **Assessment tasks.**
 - **Project.** A final and integrating project.
