Subject: 27404 - Principles of law and mercantile law

Faculty / School: 109 - Facultad de Economía y Empresa

Degree: 417 - Degree in Economics

ECTS: 6.0

Year: 1

Semester: First semester

Subject Type: Basic Education

Module: ---

1.General information

1.1.Aims of the course

1.2.Context and importance of this course in the degree

1.3.Recommendations to take this course

2.Learning goals

2.1.Competences

2.2.Learning goals

2.3.Importance of learning goals

3.Assessment (1st and 2nd call)

3.1.Assessment tasks (description of tasks, marking system and assessment criteria)

4.Methodology, learning tasks, syllabus and resources

4.1.Methodological overview

The learning process designed for this subject is based on: the course has a theoretical and practical dimension. Therefore the methodology combines, on the one hand, in-person classes (with theoretical and practical teaching based on the case method, oral presentation and discussion by students) and, on the other, independent work by students which takes place outside the classroom.

4.2.Learning tasks

The program offered for students to help them achieve the expected results includes the following activities:

On-site activities

Activities which require the student's presence in the classroom shall alternate conveniently theory lectures and case method and problem based learning.

Exhibition and knowledge systematization in charge of professors

These activities are assigned a total of 30 hours per student and group. Such classes provide students with a first contact with theoretical concepts and basic knowledge that will allow them subsequently a more efficient

personal work and, ultimately, a better understanding of the subject. These sessions will be held once a week.

Dynamic activities between lecturers and students

To perform these kinds of activities the main group is divided into two subgroups. Time allocated for these tasks is 30 hours per student and subgroup.

The skills promoted through these classes are: Participation of the student in the classroom will be encouraged through case method. By means of this system the student develops their ability to identify and analyze legal problems as well as his or her critical sense and oral skills. In addition, in this way, the student becomes familiar with the use of legal terminology. Acquisition of transversal competency consisting of ICT use for the location of legal information.

These activities are complemented by mentorship and seminars to clear up doubts and clarify the most complex theoretical and practical contents of the subject and to supervise work developed by students.

Self-directed learning or personal work

Personal work outside the classroom is also essential for learning. It will consist of, among other activities:

1. Reading and directed study of bibliographical material indicated and / or provided by the professor responsible for the group.
2. Analysis and resolution of issues and cases proposed by the teacher.
3. The study of the theoretical and practical contents, resolution of practical cases, as well as consultation and analysis of information required for legal task implementation.

(*) Teaching methodology will be face-to-face. However, if it is necessary for health reasons, teaching may be delivered electronically.
