4.2. Learning tasks

Every week, theoretical questions and practical exercises that help to strengthen the theoretical base will be suggested, and computer lab sessions will be held. All this work will be filed in a portfolio. Participation in the resolution of exercises and the portfolio will be evaluated and form part of the final mark.

The teacher will request the portfolio (with due notice) to revise and evaluate the contents, so it should be updated weekly.

The main contents of the portfolio will be included in the material examined in the global exam. The score for the portfolio is indicated in the evaluation section.

All the materials and information necessary for the realization of the weekly exercises for the portfolio and to prepare the lectures will be provided on-line. The students should be aware of the updates of the on-line information and use their university e-mail addresses for communications about the course.

Learning methodology is assumed to be presence-based in the classroom. However, sanitary circumstances may require a change into an on-line methodology.
