4.1.Methodological overview

Microeconomics IV is devoted to the economic analysis of oligopolistic markets and market failures caused by both the existence of market power and also due to asymmetric information. Since the main analytic tool that is used in studying oligopolies is game theory, the first part of the course introduces its basic concepts.

4.2.Learning tasks

The learning process that has been designed for this course is based on the following activities:

- 1.- Participative lectures. The professor will explain the basic course content. The student must supplement the explanations with the recommended reading.
- 2.- Practical classes. Students will solve practice exercises, always under the supervision of the instructor. This will be done in smaller groups to facilitate the participation of each student.

The program offered to the students to help them achieve the learning results includes the following activities:

Lectures:

Credits: 1,2.

Methodology: Class attendance and participative problem-solving.

Practical classes:
