4.1.Methodological overview

The learning process designed for this subject is based into five pillars: the theory sessions, practice sessions, seminars, tutorial and autonomous work and study.

During the lectures, the teacher will explain the main concepts about marketing research and the process of different research methodologies. The degree of comprehension of main concepts will be checked through "one minute papers".

In practice session, students will work on case studies, exercises, readings and teamwork. These activities will help to understand the market research's process.

Seminars and tutorships will be useful to review those doubts arising from the theory and practice classes and also to prepare the cases and proposed exercises. Moreover teachers will supervise the group work.

Finally, students will need personal work for solving exercises and case studies, developing their research proposals as well as preparing the exam.

4.2.Learning tasks

The syllabus that the student is offered to help you achieve the expected results, and shown at the end of this section. includes the following activities ...

Evaluable activities:

- "One minute paper".
- Teamwork.
- Exercises
- Case studies

Other activities not subject to evaluation:

- Practical cases.
- Exercises.
- Readings

The teaching methodology is planned to pivot around face-to-face classes. However, if it is necessary for health reasons, the classes can be given online.

The assessment will be prepared to be carried out as face-to-face examination, but if health circumstances do not allow it, they will be carried out by doing it entirely online or in a blended way. In the case of online exams, it is important to highlight that, the student may be recorded, and he or she can exercise his or her rights by the procedure indicated in.
