4.1.Methodological overview

Economic Administrative Law has become a high-profile legal discipline. The territorial issues, such as urban planning, understood as an economic sector as well as a public policy political sector, rounds the course out. Thus, the course allows the student to deepen the study of administrative sectors with a high social relevance, settling in the general knowledge previously acquired through its application to specific problems and leading to a potential specialization in administrative law.

The activities? program is the task of the professor in charge of each group, as they may have a variety of proposals and therefore it might be modified according to the professor?s criteria and their own teaching experience

4.2.Learning tasks

4.3.Syllabus

The course will address the following sections and topics:

- First section: Economic constitution: content and limits of ownership right and business freedom. The European community framework. Public initiative: public sector and public enterprise.
