

29227 - Undergraduate Dissertation

Syllabus Information

Academic Year: 2020/21

Subject: 29227 - Undergraduate Dissertation

Faculty / School: 229 - Facultad de Ciencias de la Salud y del Deporte

Degree: 441 - Degree in Human Nutrition and Dietetics

ECTS: 6.0

Year: 4

Semester: Second semester

Subject Type: End of Grade Dissertation

Module: ---

1.General information

1.1.Aims of the course

1.2.Context and importance of this course in the degree

1.3.Recommendations to take this course

2.Learning goals

2.1.Competences

2.2.Learning goals

2.3.Importance of learning goals

3.Assessment (1st and 2nd call)

3.1.Assessment tasks (description of tasks, marking system and assessment criteria)

4.Methodology, learning tasks, syllabus and resources

4.1.Methodological overview

The aim of the Dissertation is to enable students to apply and develop a range of skills and competences acquired throughout the Degree. Students are expected to show their competence in planning, writing and defending a piece of research on a topic. This process is mainly based on the student's autonomous work but his/her progress will be supervised by a supervisor in tutorials throughout the academic year.

4.2.Learning tasks

The complexity and the requirement of the dissertation correspond to 6 ECTS (150 hours of student work), and therefore the work planning on the project and the preparation of the defense must accomplish that level of involvement. The student must agree with their supervisor the learning tasks and planning corresponding to the undergraduate dissertation. The supervisor will guide the student in the process, but the dissertation requires the acquisition of key competences regarding initiative, creativity, disciplinary integration, planning, and autonomous work organization.

4.3.Syllabus

There is no specific syllabus for this course.

4.4.Course planning and calendar

The necessary documentation and other details regarding this course will be available on the website of the Faculty and Moodle.
