

60565 - Water resources and hydraulic facilities

Syllabus Information

Academic Year: 2020/21

Subject: 60565 - Water resources and hydraulic facilities

Faculty / School: 201 - Escuela Politécnica Superior

Degree: 546 - Master in Agricultural Engineering

ECTS: 6.0

Year: 1

Semester: First semester

Subject Type: Compulsory

Module: ---

1.General information

1.1.Aims of the course

1.2.Context and importance of this course in the degree

1.3.Recommendations to take this course

2.Learning goals

2.1.Competences

2.2.Learning goals

2.3.Importance of learning goals

3.Assessment (1st and 2nd call)

3.1.Assessment tasks (description of tasks, marking system and assessment criteria)

4.Methodology, learning tasks, syllabus and resources

4.1.Methodological overview

The methodology followed in this course is oriented towards achievement of the learning objectives. It is focused on applied technology and it favors the acquisition of skills needed in professional practice.

The theoretical contents are taught with the support of ppt, animations, interactive examples, and encouraging the active participation of students and the incorporation of their own experience. Practical contents of the course consist on practical examples using computer tools provided in the course.

4.2.Learning tasks

The course includes the following learning tasks:

- Lectures (30 hours).
- Exercises and case studies (20 hours).
- Computer laboratory practice sessions (10 hours).
- Optional homework projects: numerical integration of flow equations, sustainability of irrigation demands, proposed exercises (24 hours)
- Study (60 hours).
- Assessment (6 hours).

4.3.Syllabus

The course will address the following topics:

Theory

- C1 Fundamentals of Hydrodynamic Transport
- C2 Free surface flows
- C3 Channel regulation
- C4. Free surface Irrigation
- C5 Transients in networks
- C6 Hydrological Cycle
- C7 Surface hydrology. Precipitation
- C8 Flood hydrographs
- C9 Underground hydrology. Wells characterization

Practice

- P1 Surface Flow steady
- P2 Surface Flow Transient I
- P3 Surface Flow Transient II
- P4 Surface irrigation
- P5 Water hammer

4.4.Course planning and calendar

The following table shows the weekly organization proposed for this course, which is divided into topics (identified as contents C1, C2, ...). For each of them, it is specified the hours of theory, exercises, practice (all in sessions of 2h), assessment (6h), and homework hours for study and exercises.

| Week | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 |
|---------------|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|
| T1 Theory | C1 | C1 | C2 | C2 | C2 | C3 | C3 | C4 | C4 | C5 | C6 | C7 | C8 | C9 | C9 |
| T2 Exercises | C1 | C1 | C2 | C2 | C2 | C3 | | | | | | C7 | C8 | C9 | C9 |
| T3 Comp Lab | | | | | | | P1 | P2 | P3 | P4 | P5 | | | | |
| T6 Homework | | | | 2h |
| T7 Study | 4h |
| T8 Assessment | | | | | | | | | | | | | | | |
