

61863 - Clinical neuropsychology

Syllabus Information

Academic Year: 2020/21

Subject: 61863 - Clinical neuropsychology

Faculty / School: 301 - Facultad de Ciencias Sociales y Humanas

Degree: 557 - Master's in General Sanitary Psychology

ECTS: 2.0

Year: 1

Semester: First semester

Subject Type: Compulsory

Module: ---

1.General information

1.1.Aims of the course

1.2.Context and importance of this course in the degree

1.3.Recommendations to take this course

2.Learning goals

2.1.Competences

2.2.Learning goals

2.3.Importance of learning goals

3.Assessment (1st and 2nd call)

3.1.Assessment tasks (description of tasks, marking system and assessment criteria)

4.Methodology, learning tasks, syllabus and resources

4.1.Methodological overview

The methodology followed in this course is oriented towards achievement of the learning objectives. The teacher will present theoretical and practical contents, which will promote questions, discussions, and public expression of opinions to finally reach some conclusions both individually and in groups.

Whenever possible, active, participative and cooperative learning methodologies will be used, as well as problem based learning (PBL) methodologies.

NOTE: If for health security reasons there's is a change in teaching from face-to-face to blended or non-face-to-face, the following modifications may be made in the evaluation of this subject:

- Same criteria and type of evaluation test established previously mentioned except that the test would be carried out by online telematic means via MOODLE. In this case, the student must have the following technological requirements: computer or similar device, and Internet connection
- In case of not having the necessary technological means, the student must inform the coordinator of the degree and the teacher responsible for the subject. The student who does not have the necessary technological means will carry out a global oral test in front of a committee composed of, at least, two professors from the area of knowledge of the subject, which will be carried out when the psychological coincidence of at least one member of a committee and the student is possible.

4.2.Learning tasks

The course includes the following learning tasks:

- 1. Lectures (1 ECTS: 10h)
- 2. Practical Activities (1 ECTS: 10h), such as: 2. Analysis of practical cases. 3. Finding information and cooperative work. 4. Reading articles or other documents related to the course contents. 5. Students' oral presentations. 6. Viewing of audiovisual material. 7. Attendance to conferences and lectures related to the course contents (whenever possible during the teaching period). 8. Lectures by professionals linked to the course contents. 9. Visits to patient's relatives associations (when teachers consider it appropriate and feasible).

4.3.Syllabus

The course will address the following topics:

1. Neuropathology and neuroimaging
2. Neuropsychology of perception, attention, memory and language
3. Neuropsychology of the frontal function
4. Neuropsychology of movement disorders
5. Neuropsychology in psychopathological disorders
6. Neuropsychology of child and adolescents
