Subject Type: Optional
Module: ---

1.General information

1.1.Aims of the course

1.2.Context and importance of this course in the degree

1.3.Recommendations to take this course

2.Learning goals

2.1.Competences

2.2.Learning goals

2.3.Importance of learning goals

3.Assessment (1st and 2nd call)

3.1.Assessment tasks (description of tasks, marking system and assessment criteria)

4.Methodology, learning tasks, syllabus and resources

4.1.Methodological overview

The methodology followed in this course is oriented towards the achievement of the learning objectives. It is based on active participation, case studies, teamwork etc. that favor the development of communicative skills and critical thinking. A wide range of teaching and learning tasks are implemented, such as lectures, practice sessions, autonomous work, tutorials, and assessment tasks.

Students are expected to participate actively in the class throughout the semester.

Classroom materials will be available via Moodle. These include a repository of the lecture notes used in class, the course syllabus, as well as other course-specific learning materials, including a discussion forum.

Further information regarding the course will be provided on the first day of class.

Note: In the event that for health security reasons there is a change in teaching from classroom to blended or non-classroom, the following modifications may be carried out: 1. The classes will be adapted to the online format (classes through Google Meet or another platform approved by Unizar). 2. Moodle will be used as the preferred way to exchange material. Scientific articles, case studies, Power Point presentations and links to various content of interest will be published. 3. Tutoring will be carried out by email and / or meetings by Google Meet or other tools approved by the University.

4.2.Learning tasks

This course is organized into 15 hours of lectures and 15 hours of practical activities, which include:

- Lectures.
- Case studies.
