

Academic Year/course: 2021/22

25210 - Foundations of environmental engineering

Syllabus Information

Academic Year: 2021/22

Subject: 25210 - Bases de la ingeniería ambiental

Faculty / School: 201 - Escuela Politécnica Superior

Degree: 571 - Degree in Environmental Sciences

ECTS: 6.0

Year: 3

Semester: First Four-month period

Subject Type: Compulsory

Module:

1. General information

2. Learning goals

3. Assessment (1st and 2nd call)

4. Methodology, learning tasks, syllabus and resources

4.1. Methodological overview

The methodology followed in this course is oriented towards the achievement of the learning objectives. A wide range of teaching and learning tasks are implemented, such as lectures, practice sessions, seminars and laboratory sessions.

4.2. Learning tasks

This course is organized as follows:

- **Lectures** (3 ECTS: 30 hours) and **Practice sessions** (1 ECTS: 10 hours). Theory contents will be explained during lectures. Among these include those dedicated to solving problems (5 sessions of 2 hours), in which the participation of students will be promoted. Likewise, 3 two-hour sessions are dedicated for the resolution of cases in the computer room, cases specially focused on applying engineering concepts to the field of environmental science. Students will have the solutions for the problems for self-evaluation.
- **Seminars (0.6 ECTS: 6 hours)**. Computer resolution (Excel and EES) of cases in the Field of Environmental Engineering. It is recommended that the student solve the cases raised during sessions. This activity will be assessed through written exams of theory and problems.
- **Laboratory sessions** (1 ECTS: 10 hours). 5 two-hour sessions. done in groups of 3 students. It is recommended that each student prepare a report containing the results of the measurements and the answers to the questions raised in the corresponding script prior to the session. Students will be provided through the teaching online platform solutions to the issues raised in the scripts of practice sessions for self-evaluation. However, in the period between two consecutive sessions of practice, the professor will address questions about the preparation of the report of the last practice done. Although the report is not evaluable, it is recalled that students may consult the written exam of laboratory practice.

4.3. Syllabus

Team work						2	2	2	2	2		2
TOTAL	7	7	7	7	7	9	9	9	9	9	9	9

Type activity / Week	12	13	14	15	16	17	18	19	Total
Classroom activity									60
Theory	2	2	2	2				-	30
Practice / Case studies									16
Laboratory practices	2		2						10
Evaluation								4	4
No classroom activity									90
Individual work	3	5	3	2	8	8	4	4	70
Team work	2	2	2	2					20
TOTAL	9	9	9	6	8	8	4	8	150

Further information concerning the timetable, classroom, office hours, assessment dates and other details regarding this course will be provided on the first day of class or please refer to the Faculty of Sciences website and Moodle.
