ECTS: 5.0

Year: 4

Semester: First semester

Subject Type: Optional

Module:

1. General information

2. Learning goals

3. Assessment (1st and 2nd call)

4. Methodology, learning tasks, syllabus and resources

4.1. Methodological overview

The learning process that is designed for this subject is based on the following: the combination of theoretical and practical classes.

The teaching methodology is planned for face-to-face classes. However, if necessary for health reasons, teaching could be delivered on line

4.2. Learning tasks

The course syllabus includes the following activities:

- Theoretical classes: sessions in which the professor exposes the contents encouraging student participation.
- Students provide material support to allow them to make a smooth track these sessions. This material will be available to students in the ADD and complements, not replaces, the notes taken in class.
- Theoretical and practical classes: review of case studies, videos or lectures and conducting, presentation or discussion of practical exercises.
- Classes in the computer classroom: both for the presentation of theoretical concepts and, fundamentally, the realization of practices.
- Presentation of T2: each group will make the presentation and defense of T2.
- Tutorials: tutorials will be held at the hours established for that purpose. Students can also consult their doubts via

- e-mail or official Twitter account. If necessary, tutoring will be provided through Google Meet or similar tools.

The assessment will be prepared to be carried out as face-to-face examination, but if health circumstances do not allow it, they will be carried out by doing it entirely online or in a blended way. In the case of online exams, it is important to highlight that the student may be recorded, and he or she can exercise his or her rights by the procedure indicated in.
