

Academic Year/course: 2021/22

29128 - Tourism: Planning and Land Management

Syllabus Information

Academic Year: 2021/22

Subject: 29128 - Planificación y gestión territorial del turismo

Faculty / School: 177 - Escuela Universitaria de Turismo

Degree: 445 - Degree in Tourism

ECTS: 6.0

Year: 3

Semester: Second semester

Subject Type: Compulsory

Module:

1. General information

2. Learning goals

3. Assessment (1st and 2nd call)

4. Methodology, learning tasks, syllabus and resources

4.1. Methodological overview

The learning process that is designed for this subject is based on the following:

The procedure is based on the continued work of the student for attending lectures, participating in classes and accomplishment of both individual and group activities that promote understanding and knowledge listed in paragraph 5.2.

The ongoing work of students along with learning activities based on theoretical and attendance of practical sessions, in which will be presented and discussed issues related to the objectives and content of the subject, and where student participation will be promoted and encouraged.

The division of students into two groups serve to carry out practical classes, in which they will apply the basic theoretical and practical concepts, (phases of planning, management models, real case studies on spatial planning of tourist towns, etc.) and managing geographic analysis tools, databases and thematic spatial data. These sessions will be encouraged to select the appropriate information and participate in group workshops.

The training activities will be interspersed with theoretical and practical sessions and practical classes, and others outside the classroom regarding potential visits, attending conferences or seminars that may be of interest to the student.

4.2. Learning tasks

Distribution of the training activities of this subject 6 ECTS credits (150 hours) is as follows:

TRAINING ACTIVITY	HOURS	
Initial Assessment	1	4.3. Syllabus The program that the student is offered to help them achieve the expected results will include the following activities: Theoretical and practical class attendance (30 hours) The theoretical program is divided into the following topics:
Theory session	40	
Practice session	6	
Tutorials	8	

Preparation of group work	25	• Topic 1. Introduction to Management and Territorial Planning of tourism.
Field trips, information collection and treatment, etc.	26	• Topic 2. Competences of tourism and territorial planning from a multidimensional and multi-scale perspective (Europe, National, Regional, Local).
Exam preparation	30	
Conduct of examinations	4	• Topic 3. Methodological phases of the tourist territorial planning process.
Oral defense of group work	10	• Topic 4. Main techniques and instruments for territorial planning and tourism management. From EEI and Carrying Capacity to Cartographic Design.
		• Topic 5. Territorial planning instruments in different tourist areas. Case Studies
		• Topic 6. Tourist Geography of Aragon.

Practical classes program and attendance (30 hours): Where the students will apply the concepts presented in the theoretical and practical sessions, and acquire skills to develop a territorial and tourism analysis. Tourist towns will be studied as real cases on territorial planning. Meanwhile, several of the practical sessions will be required to use applications for the use of cartographic displays, collection, representation and analysis of databases of spatial and thematic data, using Geographic Information Systems (GIS), visualisation of aerial images, etc.

Scheduled tutorials (8 hours): Allow the teacher to track students answering questions or presenting their progress in this area. These will be included in the tutoring schedule to be indicated at the beginning of the course.

4.4. Course planning and calendar

Schedule of sessions and presentation of work

Theoretical and practical calendar program and classroom activities

- Item 1 - 1st and 3rd weeks of lessons.
- Item 2 - 4th and 6th week of lessons.
- Item 3 - 7th and 13th week of lessons.
- Item 5 and 6 - will be taught from the beginning of the course

The program is indicative and may be modified. In any case scheduling of classroom activities, students will communicate on the Moodle platform.

Students benefiting from the system of continuous assessment will be tested for theoretical and practical assessment at the end of item 2 and item 4. Any activity, event or test is conveniently notified via the *Moodle* platform.

Non-contact activities program calendar

The practical work of the course will be explained in detail at the beginning of it, so that the student can investigate the matter and shape the knowledge and skills acquired accordingly.

4.5. Bibliography and recommended resources
