

Academic Year/course: 2021/22

## 39022 - Mathematical Modelling

### Syllabus Information

**Academic Year:** 2021/22

**Subject:** 39022 - Mathematical Modelling

**Faculty / School:** 100 - Facultad de Ciencias

**Degree:** 577 - Joint Program in Physics and Mathematics

**ECTS:** 6.0

**Year:** 5

**Semester:** First semester

**Subject Type:** Compulsory

**Module:**

## 1. General information

### 1.1. Aims of the course

See the guide of the module with the same name in the Mathematics degree.

### 1.2. Context and importance of this course in the degree

See the guide of the module with the same name in the Mathematics degree.

### 1.3. Recommendations to take this course

See the guide of the module with the same name in the Mathematics degree.

## 2. Learning goals

### 2.1. Competences

See the guide of the module with the same name in the Mathematics degree.

### 2.2. Learning goals

See the guide of the module with the same name in the Mathematics degree.

### 2.3. Importance of learning goals

See the guide of the module with the same name in the Mathematics degree.

## 3. Assessment (1st and 2nd call)

### 3.1. Assessment tasks (description of tasks, marking system and assessment criteria)

See the guide of the module with the same name in the Mathematics degree.

## 4. Methodology, learning tasks, syllabus and resources

### 4.1. Methodological overview

See the guide of the module with the same name in the Mathematics degree.

## **4.2. Learning tasks**

See the guide of the module with the same name in the Mathematics degree.

## **4.3. Syllabus**

See the guide of the module with the same name in the Mathematics degree.

## **4.4. Course planning and calendar**

See the guide of the module with the same name in the Mathematics degree.

## **4.5. Bibliography and recommended resources**

See the guide of the module with the same name in the Mathematics degree.
