

Academic Year/course: 2021/22

39045 - Applied and Computational Algebra

Syllabus Information

Academic Year: 2021/22

Subject: 39045 - Applied and Computational Algebra

Faculty / School: 100 - Facultad de Ciencias

Degree: 577 - Joint Program in Physics and Mathematics

ECTS: 6.0

Year: 5

Semester: Second semester

Subject Type: Optional

Module:

1. General information

1.1. Aims of the course

See the guide of the module with the same name in the Mathematics degree.

1.2. Context and importance of this course in the degree

See the guide of the module with the same name in the Mathematics degree.

1.3. Recommendations to take this course

See the guide of the module with the same name in the Mathematics degree.

2. Learning goals

2.1. Competences

See the guide of the module with the same name in the Mathematics degree.

2.2. Learning goals

See the guide of the module with the same name in the Mathematics degree.

2.3. Importance of learning goals

See the guide of the module with the same name in the Mathematics degree.

3. Assessment (1st and 2nd call)

3.1. Assessment tasks (description of tasks, marking system and assessment criteria)

See the guide of the module with the same name in the Mathematics degree.

4. Methodology, learning tasks, syllabus and resources

4.1. Methodological overview

See the guide of the module with the same name in the Mathematics degree.

4.2. Learning tasks

See the guide of the module with the same name in the Mathematics degree.

4.3. Syllabus

See the guide of the module with the same name in the Mathematics degree.

4.4. Course planning and calendar

See the guide of the module with the same name in the Mathematics degree.

4.5. Bibliography and recommended resources

See the guide of the module with the same name in the Mathematics degree.
