

Academic Year/course: 2021/22

39514 - Computer Science Theory

Syllabus Information

Academic Year: 2021/22

Subject: 39514 - Computer Science Theory

Faculty / School: 110 - Escuela de Ingeniería y Arquitectura

Degree: 607 -

ECTS: 6.0

Year: 3

Semester: First semester

Subject Type: Basic Education

Module:

1. General information

1.1. Aims of the course

See the guide of the module with the same name in Informatics Engineering degree.

1.2. Context and importance of this course in the degree

See the guide of the module with the same name in Informatics Engineering degree.

1.3. Recommendations to take this course

See the guide of the module with the same name in Informatics Engineering degree.

2. Learning goals

2.1. Competences

See the guide of the module with the same name in Informatics Engineering degree.

2.2. Learning goals

See the guide of the module with the same name in Informatics Engineering degree.

2.3. Importance of learning goals

See the guide of the module with the same name in Informatics Engineering degree.

3. Assessment (1st and 2nd call)

3.1. Assessment tasks (description of tasks, marking system and assessment criteria)

See the guide of the module with the same name in Informatics Engineering degree.

4. Methodology, learning tasks, syllabus and resources

4.1. Methodological overview

See the guide of the module with the same name in Informatics Engineering degree.

4.2. Learning tasks

See the guide of the module with the same name in Informatics Engineering degree.

4.3. Syllabus

See the guide of the module with the same name in Informatics Engineering degree.

4.4. Course planning and calendar

See the guide of the module with the same name in Informatics Engineering degree.

4.5. Bibliography and recommended resources

See the guide of the module with the same name in Informatics Engineering degree.
