

Academic Year/course: 2021/22

69204 - Master's Dissertation

Syllabus Information

Academic Year: 2021/22

Subject: 69204 - Trabajo fin de Máster

Faculty / School: 110 - Escuela de Ingeniería y Arquitectura

Degree: 519 - Master's in Architecture

ECTS: 30.0

Year: 1

Semester: Second semester

Subject Type: Master Final Project

Module:

1. General information

2. Learning goals

3. Assessment (1st and 2nd call)

4. Methodology, learning tasks, syllabus and resources

4.1. Methodological overview

The Master's Final Project (MFP) is an original piece of work that promotes student autonomous work. Therefore, there are no lectures nor practice sessions in this course, but tutorials with the project supervisors.

The supervision of the Master Final Project has been traditionally organised in three lines:

- Design Workshop: it is a Workshop made up of various Classrooms, led by a Professor from the Design Area.
- Integrated Urban and Landscape Projects (PUPI), led by the Urban and Spatial Planning Area.
- RE-ENERGY, led by the Architectural Constructions Area.

In each of the three lines supervisors are assigned to each student and the topics of the MFP are normally linked to the contents of the compulsory courses of the first semester. However, students can also propose free MFP topics under the supervision of teachers of the Master.

4.2. Learning tasks

The course includes the following learning tasks:

- Autonomous work by the student.
- Tutorials with the supervisors of the MFP.
- Additionally, some activities may be offered by the Workshops or the Coordinated groups of teachers to reinforce the good development of the students' work, such as formative evaluation (through the revision of the project conceptual and scheme design) that allows to guide students in a timely and pertinent way about the strengths and areas for improvement of their projects.

4.3. Syllabus

There is no syllabus for this course.

4.4. Course planning and calendar

The MFP calendar is established by the School of Engineering and Architecture.

The tutorials dates with the supervisors of the MFP will be agreed with them.

The activities of each Workshop or Group of coordinated teachers will be announced by each of them.

4.5. Bibliography and recommended resources
