## 1. General information

## 2. Learning goals

## 3. Assessment (1st and 2nd call)

## 4. Methodology, learning tasks, syllabus and resources

### 4.1. Methodological overview

This practice period draws on students' placement in a school in order to observe and reflect on the school's organization and their mentor's teaching practice, linking in with the theoretical aspects studied during students' first BA year. As a result, the student is expected to acquire competencies that better integrate the theoretical knowledge taught in the degree and, on the other hand, highly useful experiential knowledge for later incorporation into the teaching profession.

### 4.2. Learning tasks

Students' placement period itself, which comprises 90 hours in total (amounting to 15 teaching/school days and 6 hours per day).

Seminars and supervision meetings with the university mentor.

Individual work session in which the teacher receives each of his/her students in order to assess the practice report.

Students' autonomous work, which involves 150 hours in total.

### 4.3. Syllabus

This course has no syllabus.

### 4.4. Course planning and calendar

The calendar of presence of the students in the school center will be established and published by each of the Faculties before the beginning of the academic year.

The calendar of seminars and individual work sessions that the professors responsible for the subject will hold with their students will also be published before the internship begins.

The calendar will be specified in the Practice Plan of each of the Faculties in which the subject is taught. Since the 2013-2014 academic year, the students of the Faculty of Education study it in the 2nd semester of the academic year.
