

Academic Year/course: 2022/23

26706 - Research and new technology

Syllabus Information

Academic Year: 2022/23

Subject: 26706 - Research and new technology

Faculty / School: 104 - Facultad de Medicina

229 - Facultad de Ciencias de la Salud y del Deporte

Degree: 304 - Degree in Medicine

305 - Degree in Medicine

ECTS: 6.0

Year: 1

Semester: First semester

Subject Type: Basic Education

Module:

1. General information

2. Learning goals

3. Assessment (1st and 2nd call)

4. Methodology, learning tasks, syllabus and resources

4.1. Methodological overview

The methodology followed in this course is oriented towards the achievement of the learning objectives. It favors the acquisition of knowledge related to scientific methodology, history of medicine and medical information and documentation. A wide range of teaching and learning tasks are implemented, are implemented, such as:

Students are expected to participate actively in the class throughout the semester.

Classroom materials will be available via Moodle. These include a repository of the lecture notes used in class, the course syllabus, as well as other course-specific learning materials, including a discussion forum.

Further information regarding the course will be provided on the first day of class.

4.2. Learning tasks

This is a 6 ECTS (150 hours) course organized as follows

- **Lectures (30 hours):** The teacher will explain the contents of the syllabus, whose purpose is the transmission of knowledge and logical fundamentals of the subject.
- **Practice sessions (30 hours):** a) Sessions with exposition and **problem-solving tasks**, b) approaching practical cases resolved with programs and databases and related to **computer practices**, and c) Development and approach of a collaborative **research project** to be carried out through the application of qualitative methodologies.
- **Evaluation** (5 hours)
- **Student autonomous work:** (80 hours)
- **Tutorials:** they will be voluntary and will take place preferably in the office of the teacher in the schedule destined for this type of educational activities

4.3. Syllabus

The course will address the following topics:

I. Methodology and Documentation

1. Methodology of scientific research (I)
2. Methodology of scientific research (II)
3. Methods of collecting information. Surveys.
4. Health information systems. Demographic sources
5. Types of documents. Description, citing and bibliographic references.
6. Vancouver norms (I)
7. Vancouver norms (II)
8. Scientific communication
9. Original article
10. Other types of journal articles: reviews, editor letters, clinical cases
11. Ethics in medical research and publication
12. Scientific production and impact. Bibliometric indicators
13. Information retrieval. Principles and foundations (I)
14. Information retrieval. Principles and foundations (II)

II. History and theory of medicine

1. Origin and distribution of diseases
2. Historical evolution of health care
3. Structure and function of the hospital: main models
4. Historical genealogy of the health professions
5. Women and medicine
6. Medicine teaching-learning models
7. The morphological sciences
8. The functional sciences
9. The science of pathology and clinical
10. The therapeutic sciences
11. Scientific language and medical terminology
12. Historical evolution of terminology and biomedical publications

III. Health system

1. Alternative medicine and medical pluralism
2. Patients in the health system
3. Health emergencies: pandemics
4. Health emergencies: wars
5. Clinical record
6. Electronic clinical record and terms (I)
7. Electronic clinical record and terms (II)
8. Health concept in Medicine
9. Health determinants
10. Health inequalities
11. Rationality in decision making

Computer Practices

- Introduction to SPSS
- Humanities and social sciences database search
- Medical humanities digital resources
- Vancouver style -Citations and bibliography: Mendeley reference manager
- Basic search in PubMed. MeSH.
- Advanced search in PubMed.
- Searching in Web of Science (WOS). Journal Citation Reports (JCR).

- Searching in Scopus, Citescore and Scimago Journal Rank (SJR).
- Searching in Scholar Google and Plus Library Cochrane.
- Types of studies design. Evidence based medicine: Sources of information.

4.4. Course planning and calendar

Further information concerning the timetable, classroom, office hours, assessment dates and other details regarding this course will be provided on the first day of class or please refer to the "Facultad de Medicina" website and the Degree website (<http://medicina.unizar.es>, <http://moodle2.unizar.es>)

4.5. Bibliography and recommended resources
