Subject: 28525 - Health in the Workplace and Risk Prevention Regulations

Faculty / School: 108 - Facultad de Ciencias Sociales y del Trabajo

Degree: 428 - Degree in Labour Relations and Human Resources

ECTS: 6.0

Year: 3

Semester: Second semester

Subject Type: Compulsory

Module:

1. General information

2. Learning goals

3. Assessment (1st and 2nd call)

4. Methodology, learning tasks, syllabus and resources

4.1. Methodological overview

The subject Health and Safety at Work requires theoretical knowledge prior to the implementation of practical assumptions. Therefore, the activities proposed will consist, first of all, of the presentation of the topics that will be carried out in classroom classes.

The general vision of the knowledge acquired in the master classes is complemented by practical classes aimed at giving students a precise and real knowledge of the problems posed by the practice of occupational risk prevention.

"The approach, methodology and evaluation of this guide is prepared to be the same in any teaching scenario. They will be adjusted to the socio-sanitary conditions of each moment, as well as to the indications given by the competent authorities."

4.2. Learning tasks

HEALTH FIELD

1. Conferences.

Presentation of the themes of the programme through lectures accompanied by examples.

2. Practical exercises
