

28901 - Physics I

Syllabus Information

Academic Year: 2022/23

Subject: 28901 - Physics I

Faculty / School: 201 - Escuela Politécnica Superior

Degree: 583 - Degree in Rural and Agri-Food Engineering

ECTS: 6.0

Year: 1

Semester: First semester

Subject Type: Basic Education

Module:

1. General information

2. Learning goals

3. Assessment (1st and 2nd call)

4. Methodology, learning tasks, syllabus and resources

4.1. Methodological overview

The learning process used in this subject is based on the following methodology:

- **Interactive exposition** combining an expositive and a demonstrative method. All the contents explained in the theory classroom will be complemented by the problem-solving. It offers students opportunities to test their ideas and opinions against the ideas and opinions of their peers.
- **Cooperative working** in the laboratory sessions.
- **Autonomous work** of the student, especially regarding the study and comprehension of the theoretical concepts and problem-solving.

4.2. Learning tasks

The learning process designed for this subject is based on the following activities:

- **Lectures**, including exposure of the theory and **problems resolution**. Students will have the content of each lecture as well as the collection of numerical exercises at the beginning of each session. One of the purposes of Physics I is to set the foundations needed for later courses, which have a more direct connection to the Sustainable Development Goals (SDG), particularly targets 6.4 (By 2030, substantially increase water-use efficiency across all sectors and ensure sustainable withdrawals and supply of freshwater to address water scarcity and substantially reduce the number of people suffering from water scarcity) and 9.4 (By 2030, upgrade infrastructure and retrofit industries to make them sustainable, with increased resource-use efficiency and greater adoption of clean and environmentally sound technologies and industrial processes, with all countries taking action in accordance with their respective capabilities).
- **Laboratory sessions**, that include the presentation of the report elaborated from the results obtained. These laboratory sessions will take 2 hours, approximately every 15 days. Students will have the content before the session, which includes the practical procedure and the theoretical contents.

- **Individualized tutoring** will monitor the learning process development.

4.3. Syllabus

The course will address the following topics:

- UNIT I: STATICS
 - Topic I.1. Introduction to vector calculation.
 - Topic I.2 Introduction to Mechanics.
 - Topic I.3 Statics of the particle. Equilibrium of the rigid solid.
 - Topic I.4. Shared forces: centres of gravity and moments of inertia of areas.
 - Topic I.5. Analysis of structures.
 - Topic I.6. Dry friction.
- UNIT II: DYNAMICS
 - Topic II.1. Kinematics of particles.
 - Topic II.2. Kinetics of particles. Method of the energy of moments.
 - Topic II.3. Dynamics of rotation of the rigid solid.
- UNIT III: MECHANICS OF SOLIDS AND FLUIDS
 - Topic III.1. Elasticity.
 - Topic III.2. Statics of fluids.
 - Topic III.3. Dynamics of fluids.

Programme of practicals

- Practical 1.- Statics
- Practical 2.- The simple pendulum and the torsion pendulum
- Practical 3.- Elasticity: Hooke's Law and Young's modulus
- Practical 4.- Measurement of densities and viscosities
- Practical 5.- Physical properties of liquids

4.4. Course planning and calendar

It is estimated that an average student should devote to this subject, 6 ECTS, a total of 150 hours. This time must include both classroom and non-attendance activities. The student must ensure that the dedication is distributed evenly throughout the semester.

Type activity / Week	1	2 (1)	3(2)	4 (3)	5	6	7	8	9	10	11	12	13	14	15	16
<i>Synchronous activities</i>																
Theory		4		2	2	2			2	2		2	2	2		
Problems		2	4	4		4	2			2	2	2	2	2	4	
Lab Sessions			2		2		2		2		2					
Assessment									2							
<i>Non-synchronous activities</i>																
Individual work	4	4	4	2	4	2	4	2	4	2	4	2	4	4	4	5.5
Group work				1.5		1.5		1.5		1.5		1.5				
TOTAL	4	10	10	10	8	9.5	8	3.5	10	8	8	7.5	8	8	8	5.5

(1) Friday September 23rd will have a Monday-schedule

(2) Friday September 30th will have a Tuesday-schedule

(3) Friday October 2nd will have a Wednesday-schedule

4.5. Bibliography and recommended resources
