

Academic Year/course: 2022/23

63246 - Internships II (Physics and Chemistry)

Syllabus Information

Academic Year: 2022/23

Subject: 63246 - Internships II (Physics and Chemistry)

Faculty / School: 107 - Facultad de Educación

Degree: 584 -

596 -

ECTS: 7.0

Year: 1

Semester: Annual

Subject Type: External Placements

Module:

1. General information

2. Learning goals

3. Assessment (1st and 2nd call)

4. Methodology, learning tasks, syllabus and resources

4.1. Methodological overview

The learning process that has been designed for this subject is based on the following:

- * Participatory assistance in the hours assigned to Practicum II.
- * Observation of the students of the Master of the dynamics of the center of Secondary Education.
- * In-depth analysis of the documents to be reviewed to achieve the results and the marked competencies. * Elaboration of a didactic proposal of the student's specialty or specific work of the specialty, making reference to the context and the academic/professional profile of the competences.
- * Contact of the students of the Master with the teachers and other educational agents to find out about the operation and materials to be able to achieve the results and the marked competences, as well as the evaluation.
- * Attendance at meetings with the tutors of the Practicum II, the Educational Center and the University.

4.2. Learning tasks

The program offered to the student to help him achieve the expected results includes the following activities... Attendance at classes with your subject tutor. You will attend the corresponding classes of your specialty, you will observe the work methodology. You will also know all the training levels where subjects of your specialty are taught in the center (Compulsory Secondary and Baccalaureate) and the existing institutional programs in the center (Basic learning and Curriculum Diversification) Design and application of a proposal of learning activities , in which there will be at least one Practical Work. Design and application of an innovation or research proposal. Seminars, discussion and debate. Discussion with colleagues in the specialty, both of the didactic proposals and of the planned materials.
