

25423 - Undergraduate Dissertation

Syllabus Information

Academic year: 2023/24

Subject: 25423 - Undergraduate Dissertation

Faculty / School: 127 - Facultad de Ciencias de la Salud

275 - Escuela Universitaria de Enfermería de Huesca

375 - Escuela Universitaria de Enfermería de Teruel

Degree: 107 - Mobility for Degree

280 - Degree in Nursing

281 - Degree in Nursing

559 - Degree in Nursing

560 - Degree in Nursing

561 - Degree in Nursing

ECTS: 6.0

Year: 4

Semester: Second semester

Subject type: End of Grade Dissertation

Module:

1. General information

The Degree Final Project (DFP) is a compulsory subject. It is a transversal subject, oriented to the evaluation of the set of knowledge and skills associated with the degree in Nursing. It has a load of 6 ECTS within the European Credit Transfer System (ECTS) and complies with article 12.7 of R.D. 861/2010, which amends R.D. 1393/2007, which establishes the organization of official university education.

The Degree Final Project subject favours the achievement of the Sustainable Development Goals (SDGs) and, specifically, Goal 3: To ensure healthy living and promote wellness for all at all ages.

More detailed information about the subject as a whole is available in the Final Project Manual <https://fcs.unizar.es/sites/fcs/files/archivos/Web%20Manual%20Enfermer%C3%ADa.pdf>

2. Learning results

In order to demonstrate the acquisition of the learning result and pass the subject, the student must develop an original work in which the different knowledge associated with the degree in Nursing is integrated.

In this sense, studies related to care planning, nursing intervention programs, projects to improve the quality of care or literature reviews on topics of special relevance in the area of nursing may be developed. Likewise, it will be possible to develop studies from a historical, comparative, critical- rational, quantitative or qualitative perspective, always related to the field of nursing. In any case, the typology of the work and its subject matter will always be agreed upon by faculty and students and will be approved by the Degree Final Project Coordination.

More detailed information about the subject is available in the Final Project Manual

3. Syllabus

Module 1. ADD/Moodle Subject: Guide of tools and guidelines for a good DFP: Nursing (Z).

Training sessions on information skills, given by the Biomedical Library staff with the objective of instructing in the use of information sources for the DFP and in the use of a bibliographic manager. . The information resources of the UZ are available through the web portal of the University Library at Zaragoza :<http://biblioteca.unizar.es>

- Know the regulations that govern the DFP
- Planning and searching for information
- Search multidisciplinary databases
- Search biomedical databases
- Alcorze
- Ethical use of information
- Bibliographic reference manager
- Once the work is finished... (uploading it to the repository, copyright, etc.)

Module 2. Program to Support the Preparation of the Degree Final Project (PAE-DFP).

- UD1. Workshop. Methodology applied to the elaboration of the DFP.
- UD2. Workshop. Scientific writing.
- UD3. Workshop. Development of impact presentations.

- UD4. Workshop. Synthesis and presentation of the DFP.
- UD5. Workshop. Public defence of the DFP

Module 3. Final Project Tutoring Program (PT-DFP).

- It will include individualized monitoring of the student by their DFP director.

More detailed information about the subject as a whole is available in the Final [Project Manual](#).

4. Academic activities

The subject will include the following academic activities:

- Expository and participative master classes.
- Elaboration of the Degree Final Project: Preparation of the work and its presentation.
- Follow-up tutorials.
- Assessment

More detailed information about the subject as a whole is available in the Final [Project Manual](#)

5. Assessment system

Evaluation of the DFP by the director

The director's grade will account for 40% of the final grade.

The evaluation will be carried out on the DFP report through the established rubric and the grade will be communicated to the DFP Coordination using the document indicated after the authorization of the defence of the project.

Evaluation of the DFP by the board of examiners

This grade will account for 60% of the final grade.

The members of the board must issue an individual grade according to a standardized model, assessing both the report of the work and the student's presentation and defence of it

Once the defence has been completed in a public session, the board in a private session will collegially grade the DFP and will draw up the minutes of the evaluation, which will be sent to the DFP Coordination.

The grading of the work will be done with the same grading system as the rest of the subjects of the official degrees following the guidelines set by Royal Decree 1125/2003, of September 5 (*BOE of September 18*), which establishes the European credit system, and which explicitly states that: they must always provide a numerical grade, between 0 and 10, and in any case rounded (or truncated) to a maximum of one decimal place. In the case of a failing grade, the examining board must issue a report detailing the deficiencies, both methodological and content-related, that justify the grade, indicating the modifications that must be made to the work, and a new defence of the work will be held at the indicated time.

The DFP Coordination will be in charge of calculating and publishing the final grade. In case of disagreement with it, the student may complain to the Coordination of the subject, which will request a report to the director and members of the board as appropriate and resolve the claim. The student will make the claim request by filling out the corresponding form with the content sufficiently argued and supported to be able to submit it for review.

More detailed information about the subject as a whole is available in the Final [Project Manual](#)
