

26718 - Face-to-Face Communication, Medical Ethics and Legislation I

Syllabus Information

Academic year: 2023/24

Subject: 26718 - Face-to-Face Communication, Medical Ethics and Legislation I

Faculty / School: 104 - Facultad de Medicina

Degree: 304 - Degree in Medicine

ECTS: 6.0

Year: 3

Semester: Second semester

Subject type: Compulsory

Module:

1. General information

Independent and transversal subject with respect to the subjects of the Degree of Medicine, composed of two subjects: "Health Care Communication, Medical Ethics" and "Legislation". Its objective is for the student to know, apply and have an adequate attitude towards their ethical and legal duties, as well as with the essential contents and skills of healthcare communication and clinical interview.

"These approaches and objectives are aligned with the following Sustainable Development Goals (SDGs) of the United Nations 2030 Agenda <https://www.un.org/sustainabledevelopment/es/>, in such a way that the acquisition of the learning results of the subject provides training and competency to contribute to Objective 3D of Goal 3, Objectives 1, 2 and 6 of Goal 5 and Objectives 1, 2 and 3 of Goal 16

2. Learning results

Upon passing this subject, the student will demonstrate that they are capable of explaining, applying and acting in accordance with legal and ethical standards in professional practice, mainly in the field of patients' rights (duties of physicians), and that they recognize all the elements that make up a clinical interview, structure them, and apply strategies for an excellent communication with the patient.

In the three areas of the subject, health care communication, ethics and legislation, the student will have acquired the basics of a "good medical practice" essential for professional practice, as well as the consequences of non-compliance with the ethical and legal norms, since:

- Any medical activity is regulated by law and medical ethics.

- Legal and deontological medical professional liability is a matter of concern to all physicians and should be correctly assessed from its causes to its consequences at all levels (health professionals, health systems, society, justice) in order to be able to prevent it effectively under society, the judiciary,) in order to prevent it effectively under the legal and ethical principles of the profession.

In all this context, it is essential to have a quality Healthcare Communication not only with the patient, but also in the development of skills in the academic and professional environment, etc. It will be extremely useful in the future because the clinical interview is an essential part of the physician's work, whatever their specialty. It should not be forgotten that the skills of Communication with the patient are essential for obtaining good data for the diagnosis and for the therapeutic intervention with the patient to be effective.

3. Syllabus

LEGISLATION

- Legal and Forensic Medicine: Introduction

- Introduction to law and health law.

- Legal/illegal practice of health professions.
