

## 29634 - Undergraduate Dissertation

### Syllabus Information

---

**Academic year:** 2023/24

**Subject:** 29634 - Undergraduate Dissertation

**Faculty / School:** 110 - Escuela de Ingeniería y Arquitectura

**Degree:** 430 - Bachelor's Degree in Electrical Engineering

**ECTS:** 12.0

**Year:** 4

**Semester:** Second semester

**Subject type:** End of Grade Dissertation

**Module:**

### 1. General information

The Degree Final Project (DFP) is a subject of 12 ECTS credits.

The objective of the DFP is to train the student to carry out, present and defend an integral project of electric engineering, as a demonstration and synthesis of the competences acquired in the degree. The student is expected to carry out an original work, under the supervision of a teacher, in a complete way, including the elaboration of the work, presentation of results, discussion of the same, elaboration of a report and public defense.

In accordance with the commitment to the 2030 Agenda, the DFP will explicitly show its direct contribution to the SDGs and their goals.

Passing this subject is mandatory for obtaining the degree in Electrical Engineering, according to the current regulations and procedures.

### 2. Learning results

In order to pass this subject, the student must demonstrate the following results:

Be able to elaborate, present and defend individually an original exercise of professional character in the field of Electrical Engineering as a demonstration and synthesis of the competences acquired.

Apply the acquired competencies to the performance of a task in an autonomous manner. Identify the need for continuous learning and develops its own strategy to carry it out.

Plan and use the necessary information for a project or academic work based on a critical reflection on the information resources used.

Be able to employ the techniques, skills and tools of electrical engineering necessary for the practice of electrical engineering.

Communicate clearly and efficiently in oral and written presentations on complex topics, adapting to the situation, type of audience and communication objectives.

### 3. Syllabus

The student must demonstrate that they have achieved the expected learning outcomes by means of the following assessment activities.

The student must develop a project, prepare a report and make an oral defense before a Tribunal constituted according to the rules and requirements established by the University of Zaragoza and the Center.

It is reminded that the DFP is an original exercise to be carried out individually, which will have sufficient elements of personal creation. In the case of joint work with another student, this must be expressly justified in the proposal, differentiating the work of each of the students so that the individual evaluation of each one is possible.

The DFP will be graded in the same way as the other subjects (quantitative and qualitative grading). The grade will be assigned by the tribunal appointed by the Center, following the indications set forth in the aforementioned DFP regulations; it will take into account the report made by the director or the speaker.

### 4. Academic activities

The student must agree with their DFP director on the training activities, which may consist of academic work, tutoring sessions and evaluation of the follow-up of the work done, depending on the proposed topic and its scope.

Regular meetings will be held to follow up on the work and solve any doubts.

### 5. Assessment system

The assessment of the DFP will be based on the following aspects:

- The quality and depth of the work itself, in accordance with the scope and objectives set forth in the proposal and the deposit made by the student, and considering the workload foreseen in the degree's verification report, - the evaluation made by the director, co-directors and, if applicable, the lecturer, in the report, and

-the public presentation of the work.

After the defense of the DFP, the members of the examining board must issue an individual evaluation report, from which the final grade will be assigned.

In the case of a failing evaluation of the DFP, the examining board must issue a report detailing the deficiencies, both methodological and content, that justify such a grade, indicating also the modifications that need to be introduced in the work, and a new defense of the work will be carried out.
