Module:

1. General information

The subject *Complementary Law* allows students to acquire the necessary knowledge and skills in law to adequately follow the compulsory and elective subjects of the Master's Degree in Circular Economy. This course is mainly aimed at students who have a degree in science and engineering and is taught at the University of La Rioja.

It is aligned with Sustainable Development Goal (SDG) No. 12 (Responsible Production and Consumption) of the United Nations 2030 Agenda(<https://www.un.org/sustainabledevelopment/es/>), so that the acquisition of its learning results provides training and competence to contribute to some extent to the achievement of the Goal.

2. Learning results

- To know the main characteristics of public authorities and public administrations.
- To know the main guarantees of individuals in their relations with the Administration.
- To be able to recognize the main implications for the company of the commercial, labour and tax legislation applicable to the company.

3. Syllabus

Topic 1. The legal system: sectors and sources. Law and the branches of the legal system. Sources of Law. The Spanish Constitution.

Topic 2. Legal relationships under private law. Private legal relationships and subjective rights. The subjects of private-legal relationships. The object of private-legal relations.

Topic 3. Legal relationships under administrative law. Public Administrations. Legal-administrative relations. The activity of public administrations and their control.

4. Academic activities

Master class: 8 hours

Group sessions of 50 minutes each. Teachers explain the theoretical contents and solve representative applied problems. The learning materials will be available on the Moodle virtual platform. Regular class attendance is strongly recommended.

Problem solving and case studies: 22 hours, including 4 face-to-face hours

Students must solve exercises, problems and cases.

Study and personal work: 42 hours

Students must study theory, read supplementary readings and prepare for the assessment test.

Assessment tests: 3 hours.

Students must write a test with several multiple-choice test questions.

5. Assessment system

- Written test with several multiple-choice questions: 100 %. The test is held simultaneously in each university under conditions that guarantee the proper identification of students and the impossibility of fraud.

The enrolment in the subject entitles the student to 2 official exam calls per enrolment. The performance of the exams and the number of official calls will be in accordance with the *Rules of Permanence in Master Studies* and the *Rules of Learning Assessment Standards* of the University of Zaragoza (<https://ciencias.unizar.es/normativas-asuntos-academicos>). The general criteria for the design of the tests and the grading system shall also be adjusted to the latter regulation, and the time, place and date of the review shall be made public when the grades are published.
