

27147 - Internships

Syllabus Information

Academic year: 2024/25

Subject: 27147 - Internships

Faculty / School: 100 - Facultad de Ciencias

Degree: 446 - Degree in Biotechnology

ECTS: 6.0

Year: 4

Semester: Indeterminado

Subject type: Optional

Module:

1. General information

The objective of this subject is to introduce students to professional environments related to the competences they are acquiring in the degree in Biotechnology

2. Learning results

- Familiarization with some of the work centres related to the degree.
- Knowledge of the type of challenges typical of a company, hospital or research center.
- Achievement of partial objectives set by the tutor for each specific work.
- Adaptation to the proposed schedule and work plan.

3. Syllabus

In this subject there is no fixed program to be developed.

4. Academic activities

Completion of a practical work related to the degree supervised by a tutor at the institution where the internship is carried out and an academic tutor of the University of Zaragoza

Preparation of a final report of activities, written with the advice and approval of the tutors in the collaborating entity, and approved by the external internship coordinator of the degree program.

5. Assessment system

The student will be evaluated by means of a report from the tutor at the collaborating entity, a report from the academic tutor and an internship report, following the centre's regulations

https://ciencias.unizar.es/sites/ciencias/files/users/fmlou/pdf/Asuntos_academicos/procedimiento_practicas_academicas_externas.pdf

Once they have seen all the documents, the coordinator of the subject will issue a report on the use and realization of the external internship. The Quality Assurance Commission will be in charge of the recognition of external internships.

6. Sustainable Development Goals

7 - Affordable and Clean Energy

9 - Industry, Innovation and Infrastructure

11 - Sustainable Cities and Communities
