

30102 - Chemistry

Syllabus Information

Academic year: 2024/25

Subject: 30102 - Chemistry

Faculty / School: 175 - Escuela Universitaria Politécnica de La Almunia
179 - Centro Universitario de la Defensa - Zaragoza

Degree: 425 - Bachelor's Degree in Industrial Organisational Engineering
563 - Bachelor's Degree in Industrial Organisational Engineering

ECTS: 6.0

Year: 1

Semester: 425 - First semester
563 - Second semester

Subject type: Basic Education

Module:

1. General information

COMPANY PROFILE

The objective of the subject is that students acquire a basic vision of the structure of matter in relation to its properties and to the chemical transformations it can undergo.

DEFENSE PROFILE

The curriculum is in the process of being phased out. The content of this teaching guide is the same as that of the 2023-2024 academic year. It can be consulted on this same website by selecting the aforementioned academic year at the top.

2. Learning results

1. Master the basic principles of general chemistry, organic chemistry and inorganic chemistry inorganic chemistry.
2. Master the basic laws that regulate reactions: thermodynamics, kinetics and equilibrium equilibrium.
3. Solve exercises and problems in a complete and reasoned way.
4. Properly apply theoretical concepts in the laboratory through the correctly and safely use of basic material and equipment.
5. Use rigorous language in chemistry.
6. Present and interpret data and results

3. Syllabus

COMPANY PROFILE

BLOCK 1. Atom and Periodic System.

Unit 1. The atom. *Unit 2.* General study of the Periodic Table.

BLOCK 2. Chemical bonding.

Unit 3.- Ionic bonding. *Unit 4.-* Covalent bonding. *Unit 5.-* Metallic bonding.

BLOCK 3. Bonds among molecules.

Unit 6.- Intermolecular bonds.

BLOCK 4. Aggregation states.

Unit 7.- Gaseous state. *Unit 8.-* Liquid state. *Unit 9.-* Solid state.

BLOCK 5. Introduction to the study of solutions.

Unit 10. Introduction to the study of solutions.

BLOCK 6. Introduction to the study of reactions.

Unit 11. Chemical equilibrium. *Unit 12.* Neutralization reactions.

BLOCK 7. Introduction to the analysis and organic chemistry.

Unit 13. Introduction to the chemical analysis of materials. *Unit 14.* Introduction to the study of Organic Chemistry.

4. Academic activities

COMPANY PROFILE

Theoretical classes: theoretical sessions with the teacher in which the subject syllabus will be explained. 25 hours

Practical classes: problem-solving sessions posed by the teacher; They may also involve carrying out experimental practices in the laboratory. 25 hours

Seminars: sessions to present topics without repercussions for evaluation. 4 hours

Evaluation tests. 6 hours

5. Assessment system

COMPANY PROFILE

CONTINUOUS ASSESSMENT system:

Two eliminatory midterm exams of the subject, compensable between them, with a grade equal to or higher than 3. The grade is obtained as an average of both if both have been passed or have been compensated with the previous requirement.

GLOBAL FINAL ASSESSMENT system:

This test must be taken by those students who have not chosen the split assessment system or those who, having chosen this system, have not passed it. The latter should only be examined in this final test of the partial tests they have pending, which they must pass in order to pass the subject.

In any case, the tests will be 50% theory and 50% problems.

6. Sustainable Development Goals

5 - Gender Equality

6 - Clean Water and Sanitation
